Apple Final Cut Pro X 10.3

◆4GBで分割されたクリップの場合

The screenshot shows the Media Import window in Final Cut Pro X. The left sidebar displays a file browser with a tree view. A red box highlights the selection of four 4GB MOV files (01260001.MOV to 01260004.MOV) under the '126YAQH0' folder. A blue callout box points to these files with the text: "4GBで分割された全てのクリップを選択する。" (Select all clips split into 4GB).

The central preview window shows a video clip of a clock and a robot. Below it is a timeline of the selected clips. The bottom metadata panel shows the selected clip's details: "Clip #1", "1920 x 1080", "50", "AVCHD", and "AVCHD 1080p50".

On the right side of the Media Import window, there are options for adding to an event, creating a new event, and file handling. A red box highlights the "Import Selected" button, with a blue callout box pointing to it: "AVCHDの場合は4GBで分割されたファイルが自動的に1Clipになりますので、そのままインポートしてください。" (In the case of AVCHD, the files split into 4GB will automatically become 1 clip, so please import them as is.)
